-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5,6,15-17,24 and 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Traut.

See first support members 1,3,6, take-up member (roller inside 4), second support member 2, retractable panel (unnumbered), stop member 14, and catch member 12. See the slot defined by channel 6 (part of the first support member) whose surrounding structure is the catch 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Traut.

The use of different colors for a variety of reasons, such as aesthetics and company logos, etc., are well known for window coverings and screens. The use of such colors for “warning” purposes is clearly a subjective recitation, i.e. certain colors

Art Unit: 3634

may "warn" certain people. The use of warning labels on window coverings is well known and it would have been obvious to provide such for the covering of Traut.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Traut in view of Hopkins.

Traut does not discuss his roll-up mechanism. However, spring rollers are well known as illustrated by Hopkins. It would have been obvious to provide Traut with such a spring motor so as to retract his screen.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Traut in view of Malamed.

The use of flexible strap handles to pull down a roller shade is well known as illustrated by Malamed at 100 and providing Traut with such would have been obvious so as to render pulling down of the shade/screen easier.

Allowable Subject Matter

Claims 7-11 and 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 23 and 26 are allowed.
